

The Yun Family's Ninth Child is an Imp! Chapter 2112

Hearing this, Mo Xiaoting glared at Yun Chujiu. The reason why no one had checked the furnace was to save her some face. After all, she was just a little girl and they were afraid that she would be embarrassed, who would have thought that she would take the initiative to bring it up.

"If that's the case, then open the lid of the furnace," the first elder shook his head. The little girl was still too young and impetuous. She wouldn't give up until she hit a wall.

Yun chujiu opened the lid of the alchemy furnace with a smile. Then, her small face twitched and she sighed. "Sigh, the great master is right. I still need some time!"

The Great Elder and the others were standing some distance away from the operating table, so they didn't see the situation inside the alchemy furnace. Hearing Yun Chujiu's words, they understood in their hearts that the pill success rate was probably less than thirty percent.

"Fang Cao, you are still young. It's already good enough that you were able to refine a primordial spirit pill. Don't be discouraged. Keep up the good work in the future," mo Xiaoquan said amiably.

"That's right. After all, a primordial spirit pill is a level 10 pill. Even if you were able to refine one successfully, it would still be amazing," Mo Xiaoan comforted Yun Chujiu even though he was secretly gloating.

Mo Xiaoting glared at Yun chujiu, "Do you know how high the heavens are now? You even bragged about an 80% success rate? But, what happened? In the past, grandfather warned you not to be arrogant. But, you are showing off in front of your uncle. When you return home, you should reflect on yourself."

The reason why Mo Xiaoting said this was to shut the first elder's mouth so that he wouldn't take the opportunity to punish Yun Chujiu.

The first elder naturally understood what Mo Xiaoting meant and smiled indifferently. He was already so old, so he didn't want to argue with a little girl. However, he originally wanted to test out this Mo Fangcao., but now, it seemed there was no need.

"Grandfather, everything you said is correct, but... but, I refined eight original spirit pills! "I'm just a little regretful. Only four of them are high-grade pills. I originally thought that there would be six high-grade pills this time!"Yun Chujiu said with a regretful expression.

Everyone..

Everyone rushed to the front of the alchemy furnace in one go. They saw that other than the residue of some medicinal herbs at the bottom of the alchemy furnace, there were eight round pills. Four of them were clearly high-grade pills with a round luster, the other four were slightly lacking in luster and were middle-grade.

Everyone was stunned!

It was actually, it was actually successfully refined?

How, How was this possible?

Didn't they say that it was a big taboo to open the lid of the alchemy furnace halfway? Moreover, the little girl had added a section of fallen petals vine into it. How was it possible for it to reach an 80% pill refinement rate? And it was even of such high quality?

After everyone recovered from their shock, they felt a little embarrassed. After all, each and every one of them had been acting like garlic for half a day just now, but now they were slapped in the face.

The first elder coughed twice. "Fang Cao Girl, refine another batch of level 10 bone grafting pills."

Yun chujiu nodded. After washing the pill refining furnace, she began to refine the bone grafting pills step by step. This fellow had gained experience this time, so he didn't need to adjust it halfway, directly at the beginning of the refinement, she deliberately increased the temperature a little. This way, the pill success rate and the quality of the pill would be reduced.

Everyone smelled a burnt smell. A thought flashed through their minds at the same time. It seemed that this little girl had hit the nail on the head. A blind cat met a dead rat. This time, her true colors were revealed!
