

The Yun Family's Ninth Child is an Imp! Chapter 2217

Yun Chujiu and the other two turned pale with fright. They never thought that there weren't any terrifying demonic beasts or evil cultivators in the deep valley of Hell. Instead, all the plants in the entire valley were demonic plants!

No wonder there were no living creatures here. No demonic beasts could escape from the encirclement of such a large area of demonic plants.

The three of them didn't have time to think too much. They began to attack the demonic plants that were constantly spreading.

However, they did not expect that many vines of the demonic plants would appear underground. The three of them had to dodge the vines on the ground while also having to worry about the underground attacks. They soon lost the ability to resist.

Yun Chujiu wanted to use the talisman and the puppet, but she realized that the talisman was ineffective, so she could only release the four dumb beasts.

Xiao Heiniao drilled into the ground and bit off the vines. Xiao Hong, the red fox, and Xiao Hei used fire to attack the demonic plants while Xiao Mogu used the mycelium to corrode the demonic plants.

With the help of the four silly cuties, Yun chujiu and the other two could finally breathe a sigh of relief. However, this was definitely not a long-term plan. Before long, the four silly Cuties would not be able to withstand it. After all, there were simply too many demonic plants.

Yun chujiu was so anxious that she wanted to bang her head against the wall. What should she do? The entire valley was filled with demonic plants. Not to mention the few of them, even a thousand people might not be able to destroy such a large area of demonic plants.

Yun chujiu thought of Xiao Heiniaos' nirvana fire, but she felt that it was not feasible. The range of the Nirvana Fire's attack was limited, and the price was too high. Perhaps the little black bird would sleep for a few years or even decades.

Yun chujiu could only ask the little flame in her right palm for help. "Little Flame, listen to me. If I turn into a white bone, you won't be able to recover! "You might even be eaten by these demonic plants after you've cultivated your intelligence. They will definitely like the taste of you."

Just as Yun Chujiu was smacking her lips, her right palm began to heat up. This fellow's heart was filled with joy, and he quickly fired several bolts of lightning at the demonic plants not far away.

A wisp of flame was mixed in the purple lightning, and the few demonic plants that were struck instantly turned into charcoal.

Xue Wuji was delighted. "Little Sister Jiu, your timing is too bad! Burn him to death!"

With the help of the ten-thousand-year-old fire marrow, the three of them finally managed to temporarily burn a small piece of the surrounding demonic plants into charcoal. The nearby demonic plants were obviously a little afraid, and both sides were in a stalemate.

Yun Chujiu and the other two quickly took advantage of this opportunity to eat and drink some water. They knew that the demonic plants would continue to pounce on them. After all, they had not touched meat for many years.

As expected, not long after, the demonic plants made a comeback. As the night grew darker, the attack power of the demonic plants was stronger than before.

Yun chujiu finally understood. If she had not asked Xiao Heiniao to burn the demonic plants with fireballs, the demonic plants would have waited until the dead of night to launch a sneak attack on them.

If that was the case, the three of them would have been caught off guard and the result would have been even worse. Fortunately, they had stumbled upon the terrifying demonic plants in time.

With the ten-thousand-year-old fire marrow as a helper, Yun Chujiu and the other two could still barely hold on. However, Yun chujiu noticed that the temperature on her palm was starting to decrease, and she knew that it was bad!

The ten-thousand-year-old fire marrow was still in its infancy stage, and it was likely that its power was about to be exhausted. Once the ten-thousand-year-old fire marrow could not be used, the three of them would really be dead.

Yun chujiu was so anxious that she gritted her teeth. Could it be that they would only end up as a pile of bones? She tried to absorb the juice of these demonic plants, but these demonic plants were different from the poisonous vines. They did not secrete venom. They only wrapped themselves around people to suffocate them, so there was no effect at all for her to absorb their juice.
