

The Yun Family's Ninth Child is an Imp! Chapter 2402

Drinking Tea?

Everyone present was shocked. Up until now, Mayor Huang of Tianluo City had only invited two people to drink tea. One was Dean Gongsun of Xingtian Academy, and the other was Dean Duanmu of Huoshi Academy.

Mayor Huang had always lived in seclusion. Many people in Tianluo City had never seen him before. Why did he invite Yun Chujiu to drink tea?

Ye Bingyu nervously tugged at Yun chujiu's sleeve, indicating that she should not go. No matter how she looked at it, this matter seemed strange. It would be strange if something good happened!

Yun chujiu smiled and said to the guard of the mayor's mansion, "The mayor invited you, but it's impolite. Let's go."

Ye Bingyu glared at Yun chujiu, "I'll go too!"

The guard of the mayor's mansion said respectfully but distantly, "Miss Ye, the mayor only invited Miss Yun. Please forgive me."

Although ye Bingyu was arrogant, she did not dare to clash with the guard of the city Lord's mansion. She could only clench her teeth and say, "Little Jiu, then I'll bring your guard and wait for you outside the city Lord's mansion. This is my voice transmission talisman."

Ye Bingyu said and handed a voice transmission talisman to Yun Chujiu. The meaning was very obvious. This was to tell the guard that if they wanted to harm Yun chujiu, she would immediately get the news.

The guard just smiled and made a hand gesture. "Miss Yun, Please!"

Yun chujiu nodded and strolled away with the guards of the mayor's residence.

Ye Bingyu was so angry that she gritted her teeth. What a heartless person! Do you know what kind of place the mayor's residence is? He actually followed her!

Yun chujiu followed the guards of the Mayor's residence all the way, pondering the purpose of mayor Huang looking for her.

No matter how big or small a city was in the immortal Yuan continent, there would always be city lords. These city lords were all from the Sky Bearing Alliance. The sky bearing alliance was basically equivalent to the imperial court in the secular world. These city lords were also equivalent to officials of different sizes. However, the strong were the most respected in the immortal Yuan continent, so these city lords could only restrict the ordinary people.

As for the big families or sects, they held the principle of not meddling in each other's affairs. They basically played their own games and gave each other face.

However, there were exceptions. Some City lords, due to their superior spiritual power and the power of their subordinates, basically became the local emperors in the cities under their jurisdiction. The clans living in the cities also had to give some face.

The city lord of Tianluo city was such an exception. According to common sense, Xingtian Academy and Huoshi Academy were equivalent to the strength of first-class clans or sects, but they did not dare to go against Mayor Huang, the students inside had to abide by the rules of Tianluo City.

There was once a student from a first-class family who did not believe in evil and openly violated the rules of Tianluo City by killing a commoner. He originally thought that Mayor Huang would not dare to do anything to him, but he did not expect mayor Huang to directly order the student to be killed.

For a moment, the public opinion was in an uproar. Everyone thought that Mayor Huang had stirred up a hornet's nest, and that the student's family would definitely not spare him.

However, everything had been peaceful. The student's family only took the student's body back and nothing else happened.

Ever since that incident, no one dared to violate the rules of Tianluo City. Mayor Huang's position in everyone's heart was almost the same as that of the local emperor.

After Yun Chujiu recalled the information about Mayor Huang, she still could not figure out why mayor Huang wanted to meet her. Could it be that he had taken a liking to her beauty?

"Ahem, Brother Guard, may I ask if Mayor Huang has taken a wife?"

The guards of the Mayor's residence:" ..."
