

## The Yun Family's Ninth Child is an Imp! Chapter 2501

Yun Chujiu had also mixed Xiao Hei in. There were a lot of monsters anyway, so no one would pay too much attention to it.

Yun chujiu rolled her eyes and said to the crowd, "To prevent the monsters from noticing something wrong, you guys are now crying for help or something. The more miserable you are, the better."

The crowd couldn't care less about being embarrassed anymore. According to Yun Chujiu, they were crying and howling. In any case, they were indeed afraid, so they were quite sincere.

With more than four hundred people howling at the same time, the sound was quite loud, and the monsters outside could be heard.

When the monsters heard the movement inside the cave, they started to use their limbs and bodies to beat the stone wall, trying to force the group out as soon as possible.

When Yun Chujiu asked the monsters to dig the cave, they shouldn't go directly to the back of the mountain. Instead, they should go out diagonally. This way, the group could stay away from the monsters, so that they wouldn't be discovered immediately.

The stones above their heads were falling more and more heavily. Yun chujiu simply told everyone to gather together and take turns to form a spiritual energy barrier. This way, they could still hold on for a while.

Two hours later, the tunnel was opened.

The reason why they were so fast could only mean that their luck had finally come to an end. When they were halfway through digging, Xiao Hei discovered a cave nearby. Hence, the demonic beasts decided to set the exit in the cave, this saved more than half of their time.

Everyone climbed into the tunnel one by one and entered the cave.

Yun chujiu carefully walked out of the cave. If she listened carefully, she could vaguely hear the sound of monsters hitting rocks from afar. It was estimated that this place was about ten miles away from the original cave, it was just that one was on the south side of the mountain, and the other was on the north side of the mountain.

The monsters would soon realize that everyone had disappeared. When the time came, they would definitely search everywhere. They had to move quickly.

Yun chujiu looked into the distance. This was still a valley with some sparse trees. There was a large patch of bushes not far from the cave. There was no large forest.

To say the least, even if there was a forest, it would not be able to block the attacks of the eight monsters.

Yun Chujiu was really worried. There were still ten days left until the end of the trial. How could she survive these ten days?

She did not know where the other students of the two academies had gone? Could it be that they were the only ones who had been teleported here? If they could gather everyone, it would not be so difficult to deal with these monsters.

Yun chujiu suddenly slapped her thigh. She was really stupid!

Comparing the number of people and the number of monsters, it could be considered the opposite!

If they did not have enough people, then they could think of a way to divide the monsters and attack them! It was not a problem for them to deal with one monster with 400 people. Now, the key was how to lure the monsters into the ambush one by one.

Yun chujiu rolled her eyes and used her divine sense to give a few instructions to the queen bee. Then, a large group of Tianluo poisonous bees flew towards the place where the monsters were.

Among the eight monsters, six were slapping the mountain. The remaining two were guarding the entrance of the cave to prevent Yun Chujiu and the others from escaping.

The six monsters were slapping the mountain with all their might when they saw a large group of Sky Luo Wasps flying towards them from all directions. Although they had thick skin and were not afraid of the Sky Luo Wasps, their eyes could not withstand it.

They kept using their limbs to drive away the sky Luo Wasps. However, these sky Luo Wasps were very difficult to deal with. They were buzzing around them, looking for an opportunity to attack their eyes.

The monsters could not be bothered. One of the monsters was stung in the eye and immediately flew into a rage! They decided not to hit the mountain anymore and started to fight with the wasps.

The wasps were probably afraid and started to retreat. The monster was not going to let them go and wanted to kill all these little things. It chased after them relentlessly.
