

## The Yun Family's Ninth Child is an Imp! Chapter 2570

Although everyone's reaction was rather quick, the flood had already receded before they could collect much.

Everyone looked at Yun Chujiu with eager eyes. The flood that they had collected was probably only enough to soak in a few times. What could they do?

"If you believe me, just do as I say. At the very least, I can guarantee that you will be able to preserve a certain amount of your physical strength. You Won't be unable to resist when danger comes,"yun chujiu said to everyone with a smile.

Although the crowd didn't know Yun Chujiu, and they knew that her spiritual power was low, they couldn't help but have some trust in her, perhaps because she had saved them previously.

Of course, the truest thought in their hearts was that this little girl was greedy. If they really couldn't do it, they would give her spiritual stones. Even if it was for the sake of spiritual stones, she probably wouldn't harm them.

Seeing that everyone had no objections, Yun Chujiu pointed at a palace in the distance. "Let's go there. That place is spacious enough, and it's a little further away from the volcano."

Hearing that, everyone got off the ship and jumped towards the palace.

After entering the palace, everyone was a little disappointed. Although this palace was quite far from the volcano, it was even more stuffy. It wasn't as cool as being outside!

Yun chujiu took out a pen and paper, sketched for a while, and then assigned everyone to work. Although everyone did not understand Yun Chujiu's intention, they still followed her instructions and started to work.

Two hours later, the people in the room, who were drenched in sweat, suddenly felt a chill. Moreover, there was a cool breeze coming from the main hall, which made people feel so comfortable that they wanted to roar a few times.

The people curiously walked out of the main hall. They saw a deep trench about ten feet deep around the main hall. In front of the main hall was a huge pit filled with water. There was something made of wood inside that kept pouring water onto the roof of the main hall, the water dripped into the trench and flowed back into the deep pit.

The bottom of the pit and the bottom of the trench were paved with green stone slabs to prevent water from seeping into the soil.

No wonder it was so cool. The cold water flowed down from the eaves of the roof and formed a curtain of water. It stirred up the cool air and naturally eased the heat.

Everyone clicked their tongues in wonder and praised Yun chujiu for being too smart!

Yun chujiu pretended to be humble and said a few words. She thought to herself that this was just a superficial effort. The water would soon be heated by the sun and would not be of much use, she had to add the cool water from the Great Void Mystic Realm into it.

No one knew about this. They only thought that the collected flood water was enough. Everyone sat on the ground, resting and eating. Perhaps they had calmed down and felt much cooler.

The people on the square were dumbfounded. How could this work? Some people blamed the disciples who were controlling the array formation, "Are you stupid? Why didn't you wait for the flood to be over before setting up the volcano? If it weren't for the flood, they would have been half-dead from the Heat!"

The disciples who were controlling the array formation were already mad. After being blamed by these people again, they were so angry that they were twitching. They gritted their teeth and released several high-level fire-type demonic beasts.

Some people felt that it was a little too much. After all, there were only floods in other areas. However, not only were there aquatic demonic beasts in area 9, but there was also a volcano. Now, there were actually so many high-level fire-type demonic beasts.., it was obvious that the people in Area 9 were not allowed to pass the test.

Some people could not stand it anymore. They took out their identity jade tokens and reported the matter to elder Linghu.
