

The Yun Family's Ninth Child is an Imp! Chapter 2596

Due to the cotton blanket blocking the entrance of the cave, the members of the Chaos Origin sect could not see what was happening inside the cave.

They thought that Yun Chujiu and the other three must have been extremely cold inside, and the anger in their hearts finally dissipated a little.

However, when Yun chujiu occasionally opened the gap of the cotton blanket to let in some air, everyone saw that the four people who were eating hotpot inside suffered another 10,000 points of damage!

That Yun Chujiu was simply Inhuman!

Why would she bring so much firewood with her? ! Could it be that she was a woodcutter in the past? !

She actually brought hotpot with her, what a good-for-nothing! Wait, that didn't seem to be a hotpot, damn! ! It was actually an alchemy furnace! ! !

They actually used an alchemy furnace as a Hotpot? Didn't they say that alchemists treasured their own alchemy furnace? Why would they waste the alchemy furnace like this?

In their anger, everyone felt a little hungry. They also wanted to eat hotpot?

A few days later, the snowstorm finally stopped, but the ground was full of water.

If they wanted to dig for ore, they could only stand in the water and dig. It was simply unbearable!

Of course, Yun Chujiu and the other two were not included in the bitter situation. Xue Wuji and the other two originally wanted to go out and dig for ore, but they were stopped by Yun Chujiu's words.

"You guys better save your strength! Think about it carefully. Even if you dig with all your might, can you dig past the others? Moreover, our mine is bigger than others'."

Jin Zhi sighed. "Then what do you think we should do? Don't tell me we should just give up? We've already passed three rounds of tests. Don't tell me we should just give up?"

"Of course we won't give up. I definitely want to enter the primordial chaos sect. Don't worry, I'll think of a way. If we can't think of a way, I'll go look for Old Man Bai Li.

Their primordial Chaos Sect's test is unfair, and he, as the sect leader, is to blame. If he doesn't make an exception to accept us, I'll go look for old man Xia Hou at the Primordial Chaos sect. I'll definitely think of

a way to convince old man Xia Hou to take us in. Therefore, you should put your hearts into your stomachs. It doesn't matter if you don't mine this lousy mine!"Yun Chujiu's eyes were full of craftiness.

Xue Wuji and the other two reacted for a while before they realized that the old man Bai Li and old man Xia Hou that Yun Chujiu mentioned were the sect masters of the primordial chaos sect and the killing sect.

They felt that Yun Chujiu's words were somewhat unreliable. How could the sect masters of two super sects be fooled by her? However, perhaps they were used to listening to Yun Chujiu's arrangements, so the three of them did not go out to continue mining. After all, standing in the water to mine was simply Inhuman torture.

Although the people outside could store the flood into their storage rings, they did not trust each other. They were afraid that they would be at a disadvantage. After all, the water was flowing, and there was no way to only collect the water in their own area.

Therefore, no one took any action to collect the water and let the water recede slowly.

After a few days, the water finally receded. Before the people could catch their breath, they heard someone exclaim, "Giant ore-devouring ant! It's a giant ore-devouring ant!"

A certain jiu, who was sitting on the recliner, opened her eyes lazily. She saw a black mass of ants rapidly approaching the mine in the distance.

She stood up and saw that it was indeed a giant ore-devouring ant!

This type of giant ore-devouring ant was about a foot long and lived in groups of demonic insects. There was a queen ant in every colony, and its composition was similar to that of a spirit bee.

Although the giant ore-devouring ant also ate other things, its favorite food was spirit ores.

Although the level of spirit energy of this type of giant ore-devouring ant was not very high, it could not withstand the large number! Moreover, they could also spray out a kind of formic acid. When a person touched it, they would feel extremely itchy, and even fester.

Therefore, cultivators would rather encounter some high-level demon beasts than these swarms of demon insects.

When everyone saw a large group of giant ore-devouring ants coming over, they hurriedly stopped mining and began to face the enemy.
