

The Yun Family's Ninth Child is an Imp! Chapter 2767

The first place Yun Chujiu wanted to go was actually the water mountain. This guy was really interesting. She just wanted to hear how the people were talking about the lotus root thief.

When the disciples of the Water Mountain saw that Yun Chujiu had come, many of them originally planned to stay far away from her to avoid being implicated by this jinx.

However, this guy was really sweet-tongued. Very soon, he got close to a few disciples.

The few disciples took a look. This Yun Chujiu was not as mysterious as the rumors said. She was just a little girl. Moreover, she was quite good at talking. It seemed that she was spreading rumors.

Thus, under Yun Chujiu's intentional or unintentional guidance, everyone began to talk about the Green Jade Lotus.

"Junior Sister Yun, you don't know. You also don't know how that Wicked Thief succeeded. He actually stole more than half of the Green Jade Lotus! Our sect leader is furious!"

"There are no signs of damage to the surrounding array formation, and no outsiders have entered the water mountain. What the hell!"

"Yes, ever since this incident happened, our water mountain's shrimp pond has increased in manpower, afraid that the wicked thief will try to get his hands on the green jade prawns again."

..

A certain lotus root thief had a thought. Aiyo, there are green jade prawns in the water mountain? He had been eating lotus roots for the past few days, so it was not bad to change his taste.

Thus, this fellow asked curiously, “Green Jade Prawns? Our Water Mountain still has green jade prawns. Didn’t they say that those things are very precious and very difficult to raise?”

One of the disciples said proudly, “Junior Sister Yun, I don’t mean to brag, but only our water mountain has Green Jade Lotus Roots and green jade prawns in the immortal Yuan continent. Do you know why?”

Yun chujiu shook her head. “Why?”

“Because Green Jade Lotus roots and green jade prawns have very high requirements for living environment, especially for water. And Our Water Mountain has a divine immortal spring. The spring water from the Divine Immortal Spring is just right for the survival of Green Jade Lotus roots and green jade prawns,”the disciple said proudly, he had no idea that he was trying to kill the Water Mountain!

“Senior brother, the immortal spring is so awesome. Why doesn’t our water mountain raise more green Jade Lotus Roots and Green Jade Prawns? Isn’t this a waste of resources?”Yun chujiu asked in confusion.

The disciple sighed. “Junior Sister Yun, you only know one thing and you don’t know the other. Although the immortal spring is good, it can only spurt out a small amount of water every day. So even if you want to expand the scale, it’s impossible.”

Yun Chujiu’s little heart beat violently. Oh My, only a little spring water can spurt out every day?

Does that mean that the underground river that she found could be used to make a big deal out of it? Maybe she could make a fortune!

This fellow suddenly had a good idea to make a fortune. It was fine if the green jade lotus root needed sunlight, but the green jade prawns were said to like the dark environment. If she could get a few pairs of green jade prawns with both males and females and put them into the underground river.., wouldn’t she make a fortune then?

This fellow had also quietly obtained the green jade prawns. The shrimp pond that was used to breed the green jade prawns was right beside the lotus pond, so this fellow decided to find an opportunity to steal the prawns.

After another half a month, this fellow felt that the wind was not so tight anymore. On a dark and windy night for a month, this fellow ran to the mountain behind Jin Feng and instructed Xiao Hei to start digging holes.

The long-eared wind-blade rabbit also came over to help. Yun chujiu told the rabbit to cover the ground with mud after they went down.

The Rabbit saw the pill that Yun Chujiu threw at it and immediately nodded in agreement.
