

The Yun Family's Ninth Child is an Imp! Chapter 2919

Zhao Zijing looked at the map. They had already walked more than half of the way. In another ten days or so, they would reach the vast desert. When that time came, it would be time for him to show off his skills.

Zhao Zijing suppressed the excitement in his heart and continued to lead the freelance martial artist alliance forward.

For two consecutive days, the road was very peaceful. Everyone's mood was extremely relaxed. The most dangerous area had already passed. Even if they encountered demonic beasts again, they would not pose any threat to them.

At this moment, a series of miserable cries rang out. Everyone was horrified to discover that many black vines had drilled out from the sand beneath their feet.

These vines had sharp thorns on them. After piercing through a person's skin, the spiritual energy in the body would quickly drain away. However, these vines were very hard, and even spiritual energy couldn't cut them off easily.

Very quickly, more than half of the people were trapped by the vines. Only the first group of cultivators were in a slightly better condition. Firstly, they were nimble and wouldn't be easily entangled by the vines. Secondly, even if they were entangled.., they could also break free faster.

Just when everyone was in a terrible situation, a large black thing flew over from the distance!

“Sand sea poisonous bees! It’s the sand sea poisonous bees! Quick, quickly put up the spiritual energy barrier!” A cultivator shouted.

Although the extreme west sand sea forbade flying, the sand sea poisonous bees could fly about ten feet above the ground. Moreover, they were extremely poisonous. Once they were stung by them, the consequences would be worrisome.

The members of the loose cultivator alliance could be said to have suffered from a broken house and continuous rain. Originally, the black vines had already caused them to be in a terrible state. Unexpectedly, now there was actually a group of sand sea poisonous bees. This was simply no way to survive!

Unexpectedly, this wasn’t the worst. Tens of thousands of red ants crawled out from the ground. They crawled along the black vines onto everyone’s bodies. The formic acid secreted by them instantly numbed everyone’s entire body.

For a moment, there were miserable howls. They felt that they were extremely unlucky!

The black vines, sand sea poisonous bees, and these black ants all had their own territories. How could they appear at the same time?

Just as everyone was in a mess, they heard someone chuckle. “TSK tsk, brother, look at these people. They are really interesting. Are they stupid? Why are they just standing there and letting the poisonous bees sting them?”

The people from the freelance martial artist alliance saw that the person who spoke was a beautiful little girl. It was that Leng Xiao Jiu! She didn't die?

They were shocked and couldn't help but fly into a rage!

Interesting? Interesting my ass!

Do they want to stand there like idiots? They were clearly bound by the vines, Alright? They were clearly paralyzed by the formic acid, alright?

The bearded man cursed, “Stupid girl, you're courting death! You'll be trapped in a while too. Let's see if you still have the mood to watch a joke.”

Yun chujiu hugged her shoulders and said with a smile, “I'm sorry! These vines, poisonous bees, and red ants don't seem to be interested in me. Maybe it's because I'm too good-looking that they don't have the heart to eat me! Just like the Sand Sea Blood Wolves didn't eat me. Being good-looking is also an advantage. Don't you think it's infuriating?”

Only then did the crowd realize that Leng Xiaojiu was very close to them. However, the black vines, poisonous bees, and red ants didn't attack her. Even Leng Kui and Feng Zhi, who were beside her, were safe and sound.

At this moment, Hei Xinjiu took out a handful of melon seeds from her storage ring, while munching on the melon seeds, she said, "TSK TSK, did you do something wicked, so God punished you? Fortunately, the three of us left the unaffiliated cultivator alliance. Otherwise, we would have suffered too!"
