

The Yun Family's Ninth Child is an Imp! Chapter 3321

Emperor Nan Xuan felt that what Emperor Xiwen said made sense. He glanced at prime minister Sima and the others, he sneered and said, "So, no matter how many tricks are used in front of absolute strength, they are useless. Some people, using such underhanded methods is really embarrassing!"

Prime Minister Sima's face was like a red cloth. He wished he could find a hole and hide in it.

Where did that disaster come from? ! This wasn't helping their East Phoenix Country, this was harming their East Phoenix Country!

After tormenting for a long time, even though they gained a few points, what was the use of it? ? ! Unless they could all win and enter the top three, their East Phoenix country might not be at the bottom. However, with this fellow, let alone the top three, they could only hand in their blank papers! It was simply too embarrassing!

However, that fellow did not feel ashamed. Instead, she felt proud. She sat on the chair and watched the other contestants refine pills with a smile. She did not even take out her alchemy furnace.

Emperor Nan Xuan and the other two could not be bothered to ridicule her anymore. They kept their words and prepared to humiliate Empress Jiu in the afternoon.

When the contestants saw that all of them were no longer winning, they took out the things that were stuffed in their ears. After all, it was really awkward to be stuffed like this.

Soon, two hours had passed. During this period of time, all of them had been very quiet. They were either in a daze or resting with their eyes closed, looking like they had broken a broken jar.

At this time, the herbs of the other contestants had already turned into medicinal liquid. It was estimated that in another hour, there would be contestants who would finish refining the pills one after another.

At this moment, all of them stood up, stretched, and said lazily, "Sigh, stupid birds fly first. You stupid birds have almost flown enough. It's time for me to start refining pills."

Those contestants almost gasped!

They had never seen such shameless people!

They were stupid birds? You're clearly the stupid bird, okay? Shameless!

The people below couldn't help but jeer. Where did all of them come from? With such thick skin, it was simply unprecedented and unprecedented!

She was going to start refining pills? Refining the eight transformation life creation pill? Don't joke around! She was probably just randomly refining it. This way, when the competition ended, there would at least be some medicinal juice in her pill refining furnace.

However, looking at her current state, it wasn't certain that the furnace would explode.

When everyone saw the pill refining furnaces that all of them had taken out, they were even more dumbfounded!

They saw that the pill refining furnace was actually only a middle-grade spirit tool with a few vegetable leaves hanging on it. That little girl rinsed it with water and then began to stuff medicinal herbs into it.

Prime Minister Sima almost vomited blood from anger!

Could it be that he didn't know how to refine pills at all? He had never heard of stuffing medicinal herbs into it without warming up!

Also, could you explain why there were vegetable leaves in the raw alchemy furnace? ! This was an alchemy furnace, not a wok! ! !

Prime minister Sima consoled himself. No matter what, it seemed that the proportion of medicinal herbs that were all won and released was correct. Although the refinement was not successful, at least it showed that she knew the formula for the eighth transformation life creation pill, this was not too embarrassing.

Prime Minister Sima wanted to cry. His requirements had already been lowered to this extent. Please don't cause any more trouble if you win all-win.

However, very quickly, prime minister Sima was so angry that he wanted to bang his head against the wall!

She actually lifted the lid of the pill refining furnace and added a purple kite grass into it. She was seeking death by playing tricks!

Didn't she know that lifting the lid of the alchemy furnace during the alchemy process was a big taboo?

All-win?

She should change her name to all-win!
