

The Yun Family's Ninth Child is an Imp! Chapter 604

Elder Qu frowned. What Little Jiu said at the beginning was still valid, but why did it sound so strange at the end?

Elder Qu asked Feng Ming and the other two. The three of them naturally repeated what Yun Chujiu had said. Although Elder Qu was still skeptical, he did not inquire further. As long as one returned safely, it was already better than anything he hoped for. As for how all four made it out unscathed, there was no need to probe further.

Since the four of them had returned safely, everyone set off to return to the Linghua sect.

Although Di Beiming had a lot of things to take care of recently, he had not seen Yun Chujiu for such a long time. How could he bear to leave just like that? Thus, he also rushed back to the Linghua sect.

However, Yun Chujiu and Di Beiming rode on Di Beiming's flying spirit tool alone.

"Prince Charming, have you seen your master? What did he say?" At that moment, Yun Chujiu was most concerned about the Strange Grass in her Dantian, she did not dare to cultivate at all, afraid that the Strange Grass would continue to grow after she broke through again, endangering her life.

Di Beiming's expression froze, he said in a low voice, "I told master about your situation. Master has never seen you in such a situation. In an ordinary person's dantian, even the slightest carelessness in cultivating would cause problems, let alone that grass growing in yours. "My master said that it's best to know where this grass came from before we can deal with it in a precise manner."

"Prince Charming, I heard from my grandfather that when I was capturing Zhou, I once caught a seed with a black light. After capturing Zhou, that seed could no longer be found. It probably ran into my Dantian at that time." Yun Chujiu was a little disappointed, she had great hopes for Di Beiming's master. After all, Di Beiming's master was almost the strongest person in the Tian Yuan Continent. If even he could not do anything about it, then no one would be able to get rid of the Strange Grass in her dantian.

“Where did that seed come from? Did the Yun family have another similar seed?” Di Beiming asked anxiously.

Yun Chujiu shook her head, “There’s only one. Grandfather said that the thing that caught Zhou was prepared by my mother. He doesn’t know where that seed came from either.”

Di Beiming pondered for a moment, “From the looks of it, we can only look into your adoptive mother first. After we return to Linghua City, we will go to see your grandfather and see if we can find some useful clues.”

Yun Chujiu lowered her head and answered in a muffled voice. Di Beiming raised his eyebrows and the corners of his mouth curled up. “Black Thing, what I told you just now was the bad news. There is also a piece of good news. Do you want to hear it?”

Yun Chujiu was stunned. “There is still good news? Of course, I want to hear it. Tell me quickly!”

“Although my master has no way to get rid of the Strange Grass in your Dantian for the time being, after listening to me describe the process of your illness, he said that the reason why your vitality was rapidly losing was probably that the Strange Grass needed a lot of nutrients to level up. Therefore, the next time you feel that the Strange Grass in your Dantian is about to level up after your breakthrough, you should immediately consume a large number of pills and high-level herbs. That should help for the time being.”

Yun Chujiu blinked her eyes and nodded. What Di Beiming said seemed to make sense. The premise was that she had to suppress the Strange Grass first. Otherwise, it might absorb all her energy and cause trouble for her again!

The only thing that could suppress the Strange Grass was the Great Void Mirror. She had to think of a way to get the fragment from the Heaven’s Gate sect. With the Great Void Mirror, it would help her suppress the Strange Grass. Yes, that was what she would do!
