

The Yun Family's Ninth Child is an Imp! Chapter 831

The Illusionary Electric Eel was so angry that it kept whipping at Yun Chujiu. It even forgot to use its electric current and just kept whipping Yun Chujiu with its two big whiskers. Unfortunately, Yun Chujiu was like a nimble little fish that could not be caught at all.

Yu Hai and the others were all dumbfounded!

'Our sect master is the most amazing person of our generation!'

In front of a Tier 13 sea creature, he was actually able to criticize with such finesse. This eloquence and courage was really admirable!

However, could this Illusionary Electric Eel be a disabled fish? Why did it only care about using its whiskers? Didn't it know how to use electricity? They would not know that the Illusionary Electric Eel was so angry that it was going to faint. It just wanted to whip this human to death!

On the ship, the people from the Godly Demon Hall could only see the water in the distance constantly churning. Obviously, there was a fierce battle going on below, but why could they not see the traces of electricity? Even if the Illusionary Electric Eel was attacking underwater, the electric current it was emitting was very strong and should be able to be seen on the surface of the water!

Some people said, "The Illusionary Electric Eel probably thinks that those people are too weak. It hasn't exercised its muscles and bones for a long time so it wants to make fun of them."

"Well, what you said makes sense.. It's like a cat playing with a mouse. Of course, it will only eat after it has played with them enough."

...

At that moment, the Illusionary Electric Eel finally remembered its innate ability. It cursed in its heart. 'I'm so mad at this weak human!! Why did I only use my whiskers?! I'll use an electric current to electrocute him to death!'

When the Illusionary Electric Eel thought of this, it stopped moving on the spot. Then, it passed an electric current at Yun Chujiu.

Yun Chujiu thought to herself, 'Lightning is essentially an electric current. Even the heavenly lightning can't kill me. You little loach want to electrocute me?!'

Not only did Yun Chujiu not dodge, but she swam toward the electric current!

Yu Hai and the others were so scared that they almost fainted!! 'Has the sect master gone mad?! Aren't you just courting death?! It's over! It's over! Our Thunder Sect was only established for a few days and was about to be disbanded.'

The Illusionary Electric Eel's eyes revealed a look of disdain. 'This human little weakling is actually stupid. No wonder he dared to scold me. If I had known earlier, I would've directly fired the electric current.'

At that time, Yun Chujiu had already swam to the front of the electric current. That beam of electric current did not falter one bit and hit Yun Chujiu.

Yu Hai and the others closed their eyes. 'It's over! Our sect master is dead for sure!'

The Illusionary Electric Eel stared proudly. 'Little weakling, you're dead for sure!'

'Wait! This is impossible! I must be seeing things! Why is that little weakling completely fine? That's impossible! That electric current must've gone off course and missed him! I'll shoot another beam. This time, I'll definitely hit him!'

The Illusionary Electric Eel shot another beam of electric current at Yun Chujiu. Then, it watched helplessly as that little human weakling was still completely fine. Moreover, he seemed to be even more energetic than before!

The Illusionary Electric Eel could not comprehend! 'How is this possible?! Even if I encountered sea creatures of the same level as me, although a beam of electric current would not kill them, it would still numb them for a while. Why is this little human completely fine?'

Yu Hai and the others widened their eyes and were dumbstruck. 'F*uck, our sect master is simply not human! He's completely fine even after being struck by the electric current from the Illusionary Electric Eel. T-This is too unbelievable!'

The Illusionary Electric Eel still could not believe that there was someone who was not afraid of electric current. It kept shooting electric currents at Yun Chujiu. Yun Chujiu leisurely allowed the electric current to hit her body. The electric current added together was not as powerful as a heavenly thunder! Was this not too weak?!
