

The Yun Family's Ninth Child is an Imp! Chapter 883

Yun Chujiu did not stop the Mighty Elephants and allowed them to charge into the sea of flowers.

After entering the sea of flowers, the five of them jumped off the backs of the elephants. The three Mighty Elephants and the Golden Tortoise were still very excited and were having fun amidst the sea of flowers.

An Feng and Secret Agent Huahua also no longer resisted the effects. Sleepiness struck them and they just wanted to lie down. The two of them could only sit cross-legged and circulate their spirit energy to resist the lethargy.

Di Beiming took out the isolation disk and activated an isolation array. Only then did everyone snap out of their stupor.

"This flower is quite beautiful. What kind of flower it is? I haven't seen it in the hundred volumes of medicinal herbs." Yun Chujiu said in confusion.

Xue Wuji suddenly slapped his thigh. "I remember! This was the Infernal Mirage Flower. It was a spiritual plant from ancient times. It is extinct now during modern times. It's said that both cultivators and demon beasts thought that this flower was too dangerous, so they eradicated it as soon as they saw it sprouting anywhere. After a long time, it gradually became extinct. How can there be such a large field of Infernal Mirage Flowers here then?"

"That's right, this is indeed the Infernal Mirage Flower. As the name implies, the fragrance emitted by this flower can cause many kinds of hallucinations. In the beginning, it's exciting, but after a while, one will start to feel sleepy. After one falls asleep, one will be immersed in hallucinations. Unless there's an external force to wake you up, you will die unknowingly, and the dead demon beast and human carcasses will become nutrients for the Infernal Mirage Flower. What was even more terrifying was that if humans or demonic beasts stayed amongst the flowers for too long, they would become dependent on its fragrance. Even if they were awakened, they would do everything they could to find this flower again and willingly send themselves to their deaths." Di Beiming added on.

“How long will it take for you to become addicted? If you become addicted, is there a way to break free of it?” Yun Chujiu nodded. The flower sounded similar to the modern poppy but the Infernal Mirage Flower seemed to be even more potent in its effects. It was indeed a flower of evil.

“You will become addicted in a month. There isn’t any reliable method and you can only rely on your willpower to forcefully get rid of your addiction. That’s why this species of flower was feared by everyone. It didn’t take long for it to become extinct.”

“A month? I wonder how long Elder Qu and the others have been trapped here. Looks like we have to hurry. Since we can’t find yet, let’s destroy these flowers first!”

Yun Chujiu rolled her eyes as she said, “Prince Charming, help me clear out a small piece of land first. I want to try something.”

Although Di Beiming did not understand what Yun Chujiu wanted to do, he still cleared out a piece of land.

Yun Chujiu took out a pile of firewood from her storage ring and struck it with lightning. Then, she used a rolling pin to hammer the burnt charcoal.

After the charred charcoal was hammered into small particles, Yun Chujiu mixed a few recovery pills into it. Then, she took out a few pieces of linen from her storage ring. After wrapping the small particles in layers, she sewed them into a simple mask.

“Little Madman, cover your mouth and nose with this and see if it has any effect.” Yun Chujiu handed the simple anti-poison mask to An Feng.

Yun Chujiu was not that confident. The anti-poison mask was filled with activated charcoal, and the process was very complicated. Although the charcoal she used was a little stronger than the fire, it might

not have any effect, however, it was mixed with a spirit awakening pill, so it should be able to make up for it.

An Feng followed Yun Chujiu's instructions and tied the two strips to his ears. Then, he covered his mouth and nose with a linen cloth.

The refreshing smell of the awakening pill instantly made people feel much more energized. In addition, the charred coal blocked the invasion of the Infernal Mirage Flower's fragrance. He instantly felt refreshed.
