

## The Yun Family's Ninth Child is an Imp! Chapter 930

After weighing the pros and cons, the Strange Grass painfully condensed a few drops of crystal clear liquid from its leaves. Yun Chujiu opened her palm and the liquid fell onto her hand. She carefully dripped the liquid onto the small sapling of the Primordial Tree.

Then, what happened next was that An Feng would never forget throughout his entire life!

The sapling of the Primordial tree actually grew thicker and taller at a speed visible to the naked eye. Then, five snow-white flowers bloomed.

Under the contrast of the fiery red leaves and branches, the five snow-white flowers grew even whiter. After another hour, the flowers gradually withered, and in their place was fruit!

However, the fruit stopped growing when it grew to the size of a fingernail. Yun Chujiu touched her chin, probably because the few drops of liquid had been used up. She could only ask the Strange Grass for a few more drops of liquid, and after the drops fell on the tree, the Primordial fruit continued to grow, after a while, a strange fragrance filled the entire cave. The Primordial fruit had matured.

The Strange Grass pitifully took credit for the Primordial fruit's explosive growth despite the cost to its own vitality. It had already managed to grow six leaves yet now, three of the leaves had wilted. Yun Chujiu comforted it, she could not wait to put the five Primordial fruits into the Jade Chest.

Di Beiming and the other two were dumbfounded. They had never dreamed that what just happened in front of them was possible. That was a Primordial fruit tree! How could a few drops of liquid speed up the process of blooming and bearing fruit that took thousands of years in just four hours? This was too unbelievable!

"Prince Charming, do you think this Primordial fruit tree can only grow in the homes of the Fire Spirit Beast?" Yun Chujiu blinked her eyes. She felt that five fruits were too little. They were not enough to even fill the gaps between her teeth.

“Because the Primordial tree is very rare, there are very few records about it. Since this Primordial tree grew in this Earthen Fire hole, I’m afraid that it needs high temperatures to grow. You’d better not move it.” Di Beiming came back to his senses and replied.

“I’m not moving this Primordial tree. I’m planning to plant a few more. When that time comes, I can eat Primordial fruit every day!” Yun Chujiu swallowed her saliva and said.

The Strange Grass in her Dantian almost twitched!

You heartless woman! Eat it every day?! It almost took my life just growing one! I still need time to recover, and you’re now talking about eating it every day! Are you trying to kill me?!

The corner of Di Beiming’s eyes twitched, “Little Jiu, although I don’t know how you did it, I’m afraid this method can’t be used too often, right?”

Yun Chujiu giggled. “I’m talking about the future. If the worse comes to worst, I’ll just wait for 3000 years. A freak like me will probably live for millions of years right?”

An Feng staggered. Miss Jiu was really daring! Millions of years?! Do you think you’re a god? Besides, gods had long been extinct. There was no such possibility.

Yun Chujiu left a lot of food for the Fire Spirit Beasts before exiting the Earthen Fire Cave. When they stepped out, the Earthen Fire of the Earthen Fire Cave started burning again.

Yun Chujiu hurried back to her small courtyard. After deactivating the isolation array, she took out the Heaven and Earth Universal furnace to refine the Universal Essence Cleansing Pill.

It had to be said that Yun Chujiu accidentally left out an important item in her handbook. The Universal Essence Cleansing Pill’s grade was too high so she used an ordinary alchemy furnace, it would definitely explode.

Yun Chujiu was about to begin, but after thinking about it, she still hesitated. To refine such a high-end pill, it would not be good to use regular flintstones. She needed to use the Earthen Fire. Hence, she hurriedly ran outside the Earthen Fire Cave and called the No. 1 and No. 2 Fire Spirit Beasts over, after she got them to produce some Earthen Fire, she started to refine the pill..
